

Establishment of Congress in Provisional mode, begin voter and delegate registration.

During the organization state the Congress will be acting in provisional mode. What this means is that the congress exists, while still in its infancy, but we currently cannot enact any laws, we cannot enforce anything, and we cannot re-establish the government as a whole. These tasks can only be done upon elections of delegates by the people.

We are also beginning the task of registering voters. In order to vote in the upcoming election you **MUST** register to vote. We do not charge for this, and to offset the cost of mailing registration forms to everyone, we have made them available for you to print off, fill out, and mail. We also have implemented an online registration form. We ask for ID for only one reason and that is to identify it is really you. Rest assure any ID number you provide us with is secured and your information is kept strictly confidential.

Delegate applications have begun as well. If you feel you have what it takes, and want the opportunity to serve the good will of the people we invite you to review the requirements and submit your application. We have already received applications from many of you and we will be getting back to you all so we can proceed from there.

We have a huge task in getting the congress off the ground after it's dormancy since 1865, but with your support and participation from all of you we can get this done!
